

# ObamaCare's Medicaid Expansion

## WHAT'S THE DIFFERENCE?

### Traditional Medicaid vs ObamaCare's Medicaid Expansion

# What About Federal Waivers?

So-called “alternative” expansions are just more expensive versions of ObamaCare’s Medicaid expansion.

## 1

Waivers don’t allow states to change eligibility or ObamaCare’s perverse funding formula that puts the truly needy at direct risk.

## 2

Waivers don’t allow states to reduce benefits, costs, or dependency.

## 3

Waiver expansions are just more expensive versions of ObamaCare’s Medicaid expansion.

In **Arkansas**, recent data shows the “Private Option” is **twice as expensive** as conventional Medicaid expansion.

In **Indiana**, HIP 2.0 will **cost \$366M or 13% more** in Year 1 than a conventional expansion model. It also creates a bigger welfare cliff and opens the door to fraud.

**BOTTOM LINE:**

**Waiver expansions put the truly needy and taxpayers at even greater risk.**
