## FGA Voters want the Right to Shop for Health Care

## KEY FINDINGS

## Voters are more likely to support Right to Shop reformer policymakers

Voters want a new health care reform that gives consumers the right to know how much non-emergency procedures will cost ahead of time so they can shop for the best option.

Voters are more likely to support a state legislator if he or she supports Right to Shop.
works best LOWERING OUT-OF-POCKET COSTS FOR PEOPLE WITH CHRONIC CONDITIONS
Voters are more likely to support Right to Shop when they learn it could mean lower out-of-pocket costs for individuals with chronic health conditions.

[^0]:    Results for this poll are based on automated telephone interviews conducted among a nationwide sample of 502 likely voters. Data for this survey research was collected by Cor Strategies Inc.

    Interviews were conducted via a computer-assisted telephone interviewing system utilizing techniques designed to achieve the highest possible respondent cooperation.
    The surveys were conducted December 19-22, 2017. The margin of sampling error is plus or minus 4.37 percentage points. The margin of sampling error may be higher for certain subgroups. Results presented may not always appear to total 100 percent due to rounding.
    Data was sampled using weighted demographic information from the U.S. Census Bureau's Current Population Survey Voting and Registration Supplement and the state election authorities. Demographic information for actual voters in past elections were used to construct sample target weights.
    The Foundation for Government Accountability paid for all costs associated with this survey.
