**10. Corporations are able to see a breakdown of health insurance plan's claims so they can make sure that the benefit they offer their employees is actually a good value. Would you support or oppose allowing smaller businesses to see the same breakdown of health insurance claims that larger companies already see so they can make sure their employees' plans are a good value?**

Support	81%	87%	81%	77%
Oppose	5%	5%	5%	4%
Unsure	14%	9%	14%	18%

**11. Many patients are unable to go to the doctor or hospital of their choice because the providers are out of their insurance plan network. Would you support or oppose allowing patients to go out of their insurance network for care as long as the cost is comparable or less expensive?**

Support	83%	86%	82%	80%
Oppose	7%	7%	6%	8%
Unsure	10%	7%	11%	12%

**12. Nursing homes and certain other health care facilities in Arkansas are required to get special permission before they can add additional beds or make improvements to their facilities. Would you support or oppose allowing nursing homes and other facilities to expand their capacity and upgrade their facilities without having to get special permission?**

Support	59%	66%	54%	57%
Oppose	26%	22%	28%	27%
Unsure	15%	13%	18%	16%

**13. Nursing homes and certain other health care facilities in Arkansas are required to get special permission from the state before opening. This reduces accessibility to care and increases patient costs. Would you support or oppose eliminating these requirements so that new nursing homes and facilities can open and increase health care capacity?**

Results for this poll are based on automated telephone interviews conducted among a statewide sample of 523 likely Arkansas voters. Data for this survey research was collected by Cor Services, Inc.

Interviews were conducted via a computer-assisted telephone interviewing system utilizing techniques designed to achieve the highest possible respondent cooperation.

The surveys were conducted January 7-12, 2021. The margin of sampling error is plus or minus 4.29 percentage points. The margin of sampling error may be higher for certain subgroups. Results presented may not always appear to total 100 percent due to rounding.

Data was sampled using weighted demographic information from the U.S. Census Bureau's Current Population Survey Voting and Registration Supplement and the state election authorities. Demographic information for actual voters in past elections were used to construct sample target weights.

The Foundation for Government Accountability paid for all costs associated with this survey.
