

# Biden's executive order on election processes has many voters confused.

64% of voters either initially oppose or are unsure how they feel about about the President's political power grab. So what happens when they find out the truth?

American voters are **less likely to support** the President's executive order when they know...

60%

it **requires federal agencies to help politically-biased organizations** provide election services on federal property.

it could be used to **keep one political party in power** indefinitely.

60%

61%

it was **a way for President Biden to bypass Congress** so he could change election policy through an executive order.

# American voters are **even less likely to support** the President's political power grab when they know...

**62%**

it could **create loopholes that permit election fraud**, such as people double voting or people voting who are ineligible to vote.

**63%**

it could mean **more voter registration applications are mailed out** than there are Americans who are eligible to vote.

**65%**

the federal government **would be able to override state election laws**.

**66%**

it could **transfer control over local and national elections** from the states and give that power to the federal government.

**69%**

it could **give the White House partisan political power** over elections.

DEMOGRAPHICS	Party Affiliation			Age			Gender	
		34% R	36% D	29% I	38% 18-44	37% 45-64	26% 65+	48% MALE

Results for this poll are based on automated telephone interviews conducted among a nationwide sample of 509 likely voters. Data for this survey research was collected by Cor Services, Inc.

Interviews were conducted via a computer-assisted telephone interviewing system utilizing techniques designed to achieve the highest possible respondent cooperation.

The surveys were conducted April 27–May 3, 2021. The margin of sampling error is plus or minus 4.34 percentage points. The margin of sampling error may be higher for certain subgroups. Results presented may not always appear to total 100 percent due to rounding.

Data was sampled using weighted demographic information from the U.S. Census Bureau's Current Population Survey Voting and Registration Supplement and the state election authorities. Demographic information for actual voters in past elections were used to construct sample target weights.

The Foundation for Government Accountability paid for all costs associated with this survey.
