

Gov. Ron DeSantis on Protecting Floridians from Big Tech

Gov. Ron DeSantis points out that Big Tech companies are more powerful than any private company in the history of the world. Their tendency to censor and deplatform people for speech they disagree with is a threat to a well-functioning republic.

Here, Gov. DeSantis discusses what the state of Florida has done to protect individual Floridians from the agendas and censorship of Big Tech and Cancel Culture, including authorizing lawsuits under state consumer fraud statute.

“There’s clearly an avenue for us to protect individual Floridians from being censored or deplatformed unfairly by Big Tech.”

—FLORIDA GOVERNOR RON DESANTIS
