# How States Can Avoid Federal Handcuffs on Unemployment Reform

**Alli Fick**  
*Deputy Research Director*

**Jonathan Ingram**  
*Vice President of Policy and Research*

# KEY FINDINGS

FEDERAL POLICY CHANGES STIFLED ECONOMIC RECOVERY AND WREAKED HAVOC ON UNEMPLOYMENT TRUST FUNDS.

STATES THAT INDEXED UNEMPLOYMENT BENEFITS TO ECONOMIC CONDITIONS WEATHERED THE COVID-19 PANDEMIC MORE FAVORABLY THAN NON-REFORM STATES.

CONGRESS DEDICATED \$362 BILLION IN ADDITIONAL FEDERAL FUNDING FOR STATE AND LOCAL GOVERNMENTS TO USE FOR "FISCAL RECOVERY."

THE BIDEN ADMINISTRATION IS ATTEMPTING TO USE THAT FUNDING TO HANDCUFF STATES.

STATES SEEKING TO DEPOSIT OR APPROPRIATE THE FUNDS SHOULD DO SO BEFORE APRIL 1, 2022, AND REFORM THEIR UNEMPLOYMENT SYSTEMS AFTER THE RULE TAKES EFFECT.

## THE BOTTOM LINE:

STATES WISHING TO USE THE NEW FEDERAL FUNDING TO SHORE UP THEIR UNEMPLOYMENT TRUST FUNDS SHOULD DO SO BEFORE APRIL 1, 2022.

## Overview

Under the guise of COVID-19, Congress fundamentally changed the nature of the unemployment insurance system, transforming it to more closely mirror welfare programs.<sup>1</sup> By providing weekly bonuses, suspending work search requirements, and extending the duration of benefits, the federal government made it more lucrative to stay home than return to work.<sup>2</sup> These federal policy changes stifled economic recovery and wreaked havoc on unemployment trust funds, leaving many states in dire straits.<sup>3</sup>

In January 2020, states' unemployment trust funds had more than \$74 billion in assets.<sup>4</sup> By November 2021, those trust funds had been completely wiped out and were more than \$9 billion in the red.<sup>5</sup> But some states weathered the pandemic better than others. States that indexed unemployment benefits to economic conditions fared far better than non-reform states.<sup>6</sup>

North Carolina, for example, tied its unemployment benefits to economic conditions in the aftermath of the Great Recession.<sup>7</sup> This policy gives unemployed workers more time to find suitable work when unemployment is high and less time when unemployment is low and jobs are plentiful.<sup>8</sup> While other states saw their trust funds go insolvent during the pandemic, North Carolina's trust fund dropped by slightly more than 20 percent.<sup>9</sup> The state's trust fund assets remain above \$3 billion—making it one of the largest unemployment trust funds in the nation with enough resources to cover another economic downturn if one were to occur.<sup>10</sup> Other states that have implemented this policy have seen similar successes.<sup>11-14</sup>

But the Biden administration is seeking to handcuff states' ability to reform their unemployment programs through a US. Department of the Treasury rule that takes effect on April 1, 2022.<sup>15</sup> States wishing to use available federal money to replenish their trust funds should deposit or appropriate the funds before April 1 and continue to reform their unemployment programs after President Biden's rule goes into effect.

**By providing weekly bonuses, suspending work search requirements, and extending the duration of benefits, the federal government made it more lucrative to stay home than return to work.**

## The Biden administration is attempting to handcuff states

In 2021, Congress enacted President Biden's \$1.9 trillion American Rescue Plan Act.<sup>16</sup> That package included \$362 billion in additional federal funding for state and local governments to use for "fiscal recovery" from the COVID-19 pandemic.<sup>17</sup> States may use these federal funds in a variety of ways, including to help replenish unemployment trust funds or repay federal loans used to pay out unemployment benefits during the pandemic.<sup>18</sup>

But in January 2022, the Biden administration finalized new regulations that attempted to block states from reforming their unemployment systems if they use the new federal funding to help shore up their unemployment trust funds.<sup>19</sup>

Under the final rule, states may not make changes to their unemployment systems that would reduce either the amount or duration of benefits for individuals on the program—such as by indexing maximum duration to economic conditions—if they deposit these federal funds into their unemployment trust funds.<sup>20</sup> These restrictions, designed to handcuff states from reforming their unemployment systems, would remain in force until at least December 2024.<sup>21</sup>

**But states are not subject to these restrictions if they act before the rule goes into effect on April 1, 2022. Importantly, states may deposit or appropriate the federal funds before the rule takes effect and continue to reform their unemployment programs after April 1.**

## States should deposit or appropriate the federal funds before April 1, 2022

Although the rule attempts to handcuff states, the U.S. Department of the Treasury explicitly stated that these new restrictions only apply to states appropriating new federal funds after the new regulations become effective on April 1, 2022.<sup>22</sup>

Treasury was unequivocal in its commitment to not penalize states before the rule takes effect:

### Federal Register Vol. 87, No. 18

4370 Federal Register / Vol. 87, No. 18 / Thursday, January 27, 2022 / Rules and Regulations

workers during the pandemic.”<sup>19</sup> The interim final rule also posed the question of what, if any, conditions should be considered to ensure that funds used under this eligible use category represent insurance impacts of the pandemic and that such use constitutes a positive economic impact that SLFRF funds should be able to address. Other commenters opposed this eligible use category, arguing that funds used under this category may not ultimately support unemployed workers. Some commenters noted that unemployment insurance taxes on businesses automatically increase when trust fund balances are low and suggested that permitting the deposit of funds into unemployment insurance trust funds prevents a net increase on businesses, some of which may not have faced negative economic impacts from the pandemic, rather than providing assistance to unemployed workers. Other commenters suggested that deposits are better thought of as savings for future needs that assistance to unemployed workers in the near term. Responding to the interim final rule’s question, several commenters suggested that, if Treasury maintains this eligible use, the final rule should require detailed reporting on funds used under this category or place conditions on this category to increase the likelihood that funds ultimately support unemployed workers. For example, some commenters suggested that recipients that deposit SLFRF funds into their trust fund should be barred from cutting unemployment insurance benefits for workers during the period of performance or from creating new barriers to accessing benefits (e.g., through the application process and ongoing requirements to maintain eligibility). One commenter, noting that unemployment insurance benefits often provide low rates of wage replacement and do not cover some types of unemployed workers, argued that recipients should not be permitted to deposit funds into the trust fund unless

the recipient concurrently expands benefits. Finally, one commenter suggested a cap on the amount of funds that can be used for this purpose as an *Eligible Use and Condition*. In the final rule, Treasury is maintaining the inclusion of this eligible use category. Because unemployment insurance trust funds directly fund benefits to unemployed workers, maintaining the availability of the trust fund is critical to the continued provision of assistance to unemployed workers. Further, funds deposited into the trust fund must be used as assistance to unemployed workers, an eligible use of SLFRF funds. Finally, while, in the absence of the SLFRF trust fund deposits would likely be funded through increases on employer payroll taxes, the eligibility of use of SLFRF funds does not depend on how obligations would otherwise be satisfied if the SLFRF were not available for this use. While deposits to unemployment insurance trust funds generally serve as assistance to unemployed workers, recipients that make deposits but also cut unemployment insurance benefits to workers substantially increase the likelihood that the deposited funds will assist unemployed workers. In other words, SLFRF funds deposited into an unemployment insurance trust fund generally serve as assistance to unemployed workers, unless recipients take policy actions that substantially decrease the extent to which SLFRF funds would flow to unemployed workers. As such, through December 31, 2024, recipients that deposit SLFRF funds into an unemployment insurance trust fund or use SLFRF funds to repay principal on Title XII advances, may not take actions to reduce benefits available to unemployed workers by changing the computation method governing regular unemployment compensation in a way that results in a reduction of average weekly benefit amounts or the number of weeks of benefits payable (i.e., the maximum benefit entitlement). Finally, until the final rule becomes effective on April 1, 2022, the interim final rule remains binding and effective.<sup>20</sup> These requirements were not in effect under the interim final rule and do not apply to funds used (i.e., obligated or expended) under the interim final rule while it is in effect. In addition, recognizing that some recipients have taken significant steps toward making a trust fund deposit or repaying principal on Title XII advances under the interim final rule, such as the legislative appropriation of funds for this purpose, even if a formal obligation has not occurred, Treasury will exercise enforcement discretion to not pursue violations of this final rule provision (i.e., the requirement not to reduce benefits) for recipients that have appropriated funds for this purpose prior to the date of adoption of the final rule consistent with the laws and procedures in their jurisdiction.”<sup>23</sup>

toward making a trust fund deposit or repaying principal on Title XII advances under the interim final rule, such as the legislative appropriation of funds for this purpose, even if a formal obligation has not occurred, Treasury will exercise enforcement discretion to not pursue violations of this final rule provision (i.e., the requirement not to reduce benefits) for recipients that have appropriated funds for this purpose prior to the date of adoption of the final rule consistent with the laws and procedures in their jurisdiction. Recipients should refer to Treasury’s Regular Reporting Compliance with the Coronavirus State and Local Fiscal Recovery Funds Interim Final Rule and Final Rule, which provides additional detail on these issues. Public Comment and Treasury Response: Technical Correction and Amendments. Following the interim final rule, Treasury received recipient questions on whether paying interest on advances received under Title XII of the Social Security Act (42 U.S.C. 12211) is an eligible use of SLFRF funds. Treasury is clarifying that such use is permissible, consistent with Treasury’s treatment of the eligibility of interest on Title XII advances under the Coronavirus Relief Fund. Treasury is further clarifying that recipients may only use SLFRF funds for contributions to unemployment insurance trust funds and repayment of the principal amount due on advances received under Title XII of the Social Security Act up to an amount equal to (i) the difference between the balance in the recipient’s unemployment insurance trust fund as of January 27, 2020 and the balance of such fund as of May 17, 2021, plus (ii) the principal amount outstanding on any Title XII advances received under Title XII of the Social Security Act as of May 17, 2021, plus (iii) the principal amount outstanding on any Title XII borrowings made from the beginning of the public health emergency to the date of publication of the SLFRF interim final rule sets a cap on the amount of SLFRF funds a recipient may use for trust fund contributions and repayment of principal on Title XII advances. Further, a recipient that deposits SLFRF funds into its unemployment insurance trust fund to fully restore the pre-pandemic balance may end down that.

“Finally, until the final rule becomes effective on April 1, 2022, the interim final rule remains binding and effective. These requirements were not in effect under the interim final rule and do not apply to funds used (i.e., obligated or expended) under the interim final rule while it is in effect. In addition, recognizing that some recipients have taken significant steps toward making a trust fund deposit or repaying principal on Title XII advances under the interim final rule, such as the legislative appropriation of funds for this purpose, even if a formal obligation has not occurred, Treasury will exercise enforcement discretion to not pursue violations of this final rule provision (i.e., the requirement not to reduce benefits) for recipients that have appropriated funds for this purpose prior to the date of adoption of the final rule consistent with the laws and procedures in their jurisdiction.”<sup>23</sup>

The final regulations make clear that states that deposit the new federal funding for their unemployment trust funds before April 1 are under no such restrictions and may reform their unemployment systems as they wish.<sup>24</sup> **The U.S. Department of the Treasury has also committed that it will not attempt to enforce these provisions against states that have not deposited the funding into their trust funds, so long as they appropriate funding for those purposes before April 1.**<sup>25</sup>

If policymakers are going to use this new federal funding to help shore up unemployment trust funds, they should ensure that they deposit or appropriate the funding prior to April 1.

## **Bottom line: States wishing to use the new federal funding to shore up their unemployment trust funds should do so before April 1, 2022.**

Federal lawmakers radically expanded unemployment during the COVID-19 pandemic, creating a cycle of benefits that largely mimicked welfare.<sup>26</sup> Tying unemployment benefits to economic conditions is a proven way for states to replenish depleted unemployment trust funds, reduce taxes on small businesses, and move people back to work as quickly as possible.<sup>27</sup> Indexing unemployment benefits can also better prepare states for the next economic downturn.<sup>28</sup>

**FEDERAL LAWMAKERS RADICALLY EXPANDED UNEMPLOYMENT DURING THE COVID-19 PANDEMIC, CREATING A CYCLE OF BENEFITS THAT LARGELY MIMICKED WELFARE.**

Although the Biden administration is attempting to handcuff states to prevent these commonsense reforms, lawmakers have no reason to fear federal action. New restrictions on unemployment reform only apply to states who accept new federal “fiscal recovery” funding after April 1. States that deposit or appropriate those funds before April 1 are not subject to those restrictions and are at no risk of the Biden administration attempting to claw back that funding.<sup>29</sup> Policymakers that wish to use the “fiscal recovery” funding for that purpose should ensure an appropriation is adopted prior to the April 1 deadline and continue to reform their unemployment programs after the deadline.
